- Easy Installation and Setup
- Hundreds of application-specific maps available for the most popular models, including 2007!
- Unprecedented 3 Year Warranty

309-360
ThunderMax
w/ AutoTune
New Modular
Design!

Easy to Use: Highly refined base maps and simple-to-use SmartLink software makes it easy to install and tune. *Your bike never ran better!*

Pick a Base Map: Maps are included in the SmartLink software. ThunderMax supplies maps for most popular applications; loading a map to the module is a simple 1-minute process, and new maps can be accessed via the internet.

High Customer Satisfaction: The new AutoTune Module fine tunes the ThunderMax to your combination and riding habits - *as you ride!*

ThunderMax grows with the changes you make to your engine - up to 124 cubic inches! Just review the extensive map library available with the SmartLink software and on-line before you select parts for your upgrade. New base map combinations are being added all the time. No time to re-map fuel points? *Let AutoTune handle the job!*
